Professional Summary

Experienced **Senior Software Developer / SDET** with a robust background in **test automation, authentication security, and cloud-native applications**. Adept at designing and implementing **scalable automation frameworks, productivity tools, and robust test infrastructure** for high-performance backend systems and web applications. Skilled in **OAuth-based authentication, distributed systems, and infrastructure as code**. Passionate about **software quality, resilience engineering, and observability**, ensuring efficient and reliable software delivery.

Expert in **.NET, C#, and Playwright-based automation**, with additional experience in **Java, JavaScript, and cloud platforms such as AWS, GCP, and Azure**. Proficient in integrating **CI/CD pipelines, microservices architecture, and secure development practices**, fostering scalable and maintainable software solutions.

Key Skills

- **Test Automation:** Playwright, API Testing, SpecFlow
 - **Programming Languages:** C#, Java, JavaScript
 - **Cloud Services:** AWS, GCP, Azure
 - **Automation Frameworks & Tools:** xUnit, NUnit
 - **Security & Authentication:** OAuth 2.0, OpenID Connect, HashiCorp Vault, Azure Key Vault
 - **Microservices & Distributed Systems:** .NET Core, Kubernetes, Docker, CI/CD Pipelines
 - **Development & Infrastructure:** DevOps, Infrastructure as Code (IaC), Observability, Resilience Engineering
-

Professional Experience

Senior Software Developer

General Motors

March 2013 - Present (11 years 3 months)

- Designed, created, and maintained **automation frameworks, tools, and services** for testing high-traffic web applications and backend systems.

- Developed **custom productivity tools** to enhance test automation effectiveness, increasing test coverage and reducing execution cost.
- Implemented **OAuth-based authentication** flows using OpenID Connect in .NET Angular applications, ensuring secure authentication.
- Integrated **Playwright UI automation** for end-to-end testing of web applications.
- Developed **automated API testing frameworks** for validating microservices and backend integrations.
- Analyzed **test and development workflows**, collaborating with teams to optimize the use of existing and newly developed technology.
- Implemented **observability and metrics** to analyze test data, identifying patterns and reporting software quality risks.

System Analyst

Hewlett Packard Enterprise

Feb 2012 - Mar 2013 (1 year 2 months)

- Led **test automation initiatives** for enterprise applications, focusing on CI/CD integration and automated regression testing.
- Developed **infrastructure for test execution** in cloud-based environments.
- Managed **virtualized test environments** using VMware vSphere and Docker.

System Programmer

Ramo Sistemas - Unidade SC

Jul 2011 - Feb 2012 (8 months)

- Developed **automated test scripts** for enterprise applications, improving test efficiency and coverage.
- Maintained **SQL-based test data management** for backend validations.

System Analyst

Daitech Industria E

Feb 2009 - Feb 2010 (1 year 1 month)

- Designed and implemented **automated testing processes** for embedded systems and industrial applications.

System Analyst

PainelTec Industria Eletrônica LTDA.

Mar 2004 - Feb 2009 (5 years)

- Developed **testing frameworks** for embedded software and industrial automation.
-

Education

Universidade Anhembi Morumbi

Bachelor's Degree, Computer Engineering (2021 - 2026)

Universidade Positivo

College, Electrical, Electronics and Communications Engineering (2004 - 2006)

Uniandrade

Bachelor's Degree, Computer Science (2000 - 2002)

Certifications & Courses

- **Advanced OAuth Security** – Udemy
 - **Playwright UI Automation** – Udemy
 - **C# Full-Stack Development** – Udemy
 - **Microservices with Spring Boot and Docker** – Udemy
 - **Clean Architecture in ASP.NET Core** – Udemy
 - **Full-Stack Development with .NET Web API & Angular** – Udemy
-

Additional Information

- **Committed to software quality and sustainable development practices**
- **Experience in collaborating with senior developers and cross-functional teams**
- **Strong analytical skills for identifying software quality risks and test optimization**
